

Marked Up Copy of Amended Claims:

1. (twice amended) A method of treating [herpetic infections or] fungal infections, said method comprising contacting the affected diseased sites with an effective amount of a composition which comprises a combination of triclosan and a cationic antimicrobial compound.

27. (amended) A method of treating fungal infections as defined in claim [26] 1 wherein the cationic agent is selected from the group consisting of chlorhexidine, cetylpyridium chloride, benzalkonium chloride, benzethonium chloride, methylbenzethonium chloride and domiphen bromide.

28. (amended) A method of treating fungal infections as defined in claim [26] 1 wherein the cationic agent is cetylpyridinium chloride.

29. (amended) A method of treating fungal infections as defined in claim [26] 1 wherein the triclosan and the cationic agent are combined in a liquid formulation with a solubilizer.

30. (amended) A method of treating fungal infections as defined in claim [26] 1 wherein the triclosan and the cationic agent are combined in a semi-solid formulation.
